Brainsweep Systems Fact Sheet

BRAINSWEEP is a vital lifetime skill that clients can easily learn within minutes!

The **BRAINSWEEP Neurokinesis Intervention System** is a precise combination of 6 (six) proprietary techniques that have been studied and reviewed by medical doctors as efficiently acting on the brain to eliminate symptoms of trauma, **such as PTSD and hyper- anxiety**. These techniques quickly work to dramatically reduce the negative impact of being exposed to trauma inducing situations such as: **natural disasters, physical injuries, accidents, war, violence, terrorism, and social issues such as rape or the “school yard bully” in social media.**

NOTE: *These positive results are achieved **without** requiring the use of medications or therapy.*

THE BRAINSWEEP 2016 PTSD STUDY

- **49,857+** Client submissions consistently volunteered that the BRAINSWEEP Neurokinesis Intervention gets immediate results.
- The client simply needs to attend confidential ONLINE appointments to learn how to do this self-administered series of precise interventions in the correct sequence and within defined timelines.
- Unlike mind based interventions and therapies, the BRAINSWEEP Intervention **does not require you, the client, “to believe” in the technique** to get the needed results.

ATTENTION: The BRAINSWEEP Intervention Technique is unique in a very significant way. The strategy has been carefully designed to get successful results **without requiring the client to disclose any description of their problems, nor any diagnosis, nor any personal details.**

Client testimonials
